

VaVie Water Element

ALKALINE WATER DISPENSER

Built-in 5 stage
PP (Polypropene Filter) +
ACF (Activated Carbon Filter) +
UF (Ultra-Filtration) +
RO (Reverse Osmosis) +
Post filter (T33)
filtration system

Model No: WE-I-01 (Silver)

Simplify Healthy Living

COMPREHENSIVE MAINTENANCE & FREE INSTALLATION

Alkaline water

Push button for alkaline water

Integrated kettle

Warm & Cold water dispenser

Ultra-violet sterilization

5-stage built-in filtration system

High capacity inner Tank

Self cleaning

Built-in TDS Controller

Elegant night light

Exterior Design (WE-I-01)

Product Description

1. The feed water of this unit should be from input tap source (municipal/domestic water).
2. The output is either warm water or cold water or alkaline water (on pressing the push button).
3. This unit has an integrated kettle to make instant hot water. Once water is filled from the dispenser, the kettle can be used to make hot water and keep it warm for further use.
4. Contains built-in PP (Polypropylene Filter) + ACF (Activated Carbon Filter) + UF (Ultra-Filtration) + RO (Reverse Osmosis) filter + Post Filter (T33) filtration system followed by UV Sterilization thereby bidding farewell to external filter system.
5. The unit includes built in TDS Controller to adjust the TDS (Total Dissolved Solids), to ensure that essential minerals in alkaline water are always present.
6. This unit was manufactured by applying international advanced technology, with features of beautiful shape, attractive appearance and ease to use. It is suitable to use at home, hotel, office space and school place and to meet the different needs of the people.
7. This Ionizer has large electroplates which increases usage life of the ionizer. System also has self-cleaning function.
8. This unit has adapted modular structure with stable quality, easy maintenance, energy saving, safe and convenient to use.
9. Additional features include high effluent flow rate, no leakage and longer lifespan.
10. This unit has an automatic cooling device to adjust the water temperature automatically which provides high performance with a double protection mechanism.
11. There is a separate discharge outlet at the back which should be connected by a pipe to remove the discharge water (produced while dispensing alkaline water).

Choice of Water

Alkaline Water	Produces water of pH 8.5	Beneficial for health by acting as a powerful antioxidant, an effective alkalizing agent and a powerful detoxifier.	
Purified Water	Dispenses RO purified water from input tap water source	Input tap water passes through 5-stage built in filtration system (PP + Activated Carbon + Ultra-filtration + Reverse Osmosis RO + Post filter(T33)) + UV to provide purified water.	
Hot Water	Water can be collected in kettle which in turn produces instant hot water	Useful for making food and beverages.	
Cold Water	Dispenses purified cold water from input tap water source	For cold water usage. Input tap water passes through 5-stage built in filtration system + UV and cooler to provide purified cold water.	

Please note that the pH value of Alkaline water will have a tolerance of +/- 0.5 depending on feed water source.

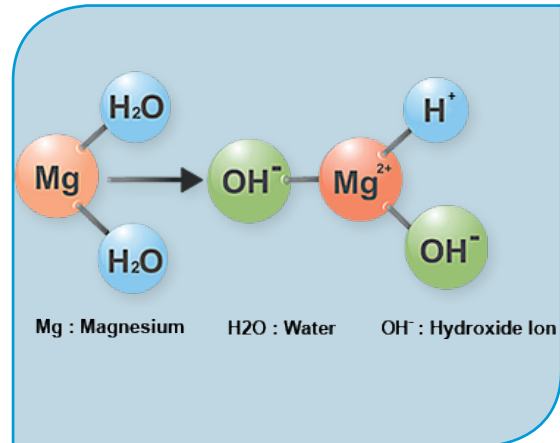

Technical Specifications

Feature	WE-I-01
Product Name	VaVie Alkaline Water Dispenser
Model Name	Water Element
Feed water type	Direct pipeline water as feed water input
Filtration System	Contains built-in PP Filter + ACF (Activated Carbon Filter) + UF (Ultra-Filtration) + RO (Reverse Osmosis) filter + Post Filter (T33) + UV Sterilization thereby bidding farewell to external filter system
Available Water levels	a. Alkaline Water - pH 8.5 b. RO Purified water c. Cold water d. Hot water using kettle
Self-Cleaning	Cleaning will start once every 50 cycles of alkaline water being dispensed.
Push button with LED Indicator	Blue LED turns ON (on pressing the push button) while dispensing Alkaline water and turns OFF while dispensing purified water (push button is OFF).
Rated Voltage	AC 230V / 50Hz
Heater Power (Kettle)	1000W
Hot Water Temperature	85 ° C - 95 ° C
Cooler Power	75W
Cold Water Temperature	7 ° C - 15 ° C
Protected Against Electric Shock	Class I Type
Package Size	400mm x 400mm x 1115mm
Approved Safety Standards	1. IEC 60335-2-15 2. SAFETY mark - Singapore

Features of WE-I-01

Push button - Push button for choosing alkaline water output. LED backlight to indicate that alkaline water will be dispensed.

TDS Controller- Can adjust the TDS (Total Dissolved Solids) , to ensure that essential minerals in alkaline water are always present.

Cup-push water dispenser faucet/tap - Strong push handle for dispensing alkaline/cold/purified water.

UV Sterilization - Effectively prevent virus, bacterial and the harmful substances thereby providing total purified water.

Elegant Light - Automatic turn ON of light making it convenient to drink at night.

In-house filtration - Contains in-built PP + ACF + UF + RO filtration system + Post filter (T33) to get purified water from input tap source.

Benefits you can get

■ WHAT IS ALKALINE WATER?

Alkaline water is the delicious, and healthy water created from progressive water technology. This dispenser, through the process of ionization, can instantaneously produce Alkaline water. Drinking alkaline water provides various health benefits thereby "Simplifying Healthy Living".

■ POWERFUL ANTIOXIDANT

The centrepiece of ionized alkaline water is its antioxidant properties. These hydroxyl ions seek out and neutralize free radicals, making them wonderful free radical scavengers and enabling a body rich in oxygen and energy.

■ BALANCE BODY pH AS AN EFFECTIVE ALKALIZING AGENT

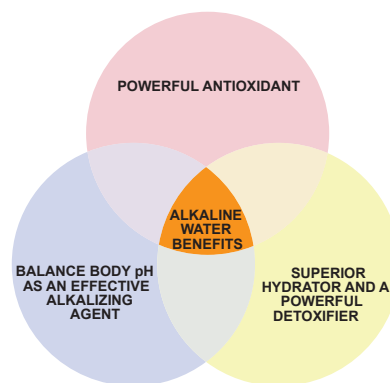

Keeping the body at healthy pH level (mild alkaline) is people's first line of defense in fighting any disease. Alkaline ionized water creates a major impact in balancing the body's pH level. A body that is too acidic provides ideal environment for diseases to manifest and thrive in.

■ SUPERIOR HYDRATOR AND A POWERFUL DETOXIFIER

One of primary causes of disease is chronic cellular dehydration, which leaves the body's cells in a perpetual state of weakness and defense. Drinking alkaline water is six times more hydrating than "conventional" drinking water. Effective hydration also helps skin look healthier and smoother.

Your Way
to
Better Health

What is pH?

A measure of acidity or alkalinity of water soluble substances (pH stands for 'potential of Hydrogen'). A pH value is a number from 1 to 14, with 7 as the middle (neutral) point. Values below 7 indicate acidity which increases as the number decreases, 1 being the most acidic. Values above 7 indicate alkalinity which increases as the number increases, 14 being the most alkaline.

Contact Information

FREE

1. One year free maintenance is provided (two times a year) which includes:
 - a. Checking for electrical parts
 - b. Checking for water leakage
 - c. Filters replacement

Please call and make arrangement to service your VaVie Water dispenser at your location*.

* Service locations must be within Singapore only.

Customers are required to register online to enjoy the warranty and our after sales services.

1. Register online on the VaVie official website : www.vavie.com.sg
2. Please enter the necessary information on the "Warranty Registration" page.
3. Contact us
 - If you have any enquires, suggestions, or feedbacks regarding our products and services, please do contact us by email, call our Service Hotline, or visit our website:
