Self cleaning

Manual Knob for water flow

Choice of Water

Alkaline 3 Strong	Produces water of pH 9.5	For removing the astringent taste in some type of vegetables. NOT SUITABLE FOR DRINKING	
Alkaline 2 Medium	Produces water of pH 9.0	Strong alkaline ion water penetrates well allowing vegetables and other ingredients to cook quickly without removing its flavor. SUITABLE FOR DRINKING	
Alkaline 1 Mild	Produces water of pH 8.5	Good for people especially for their digestive tracts. SUITABLE FOR DRINKING	
Purified Water	Input feed (municipal) water passes through a 3 stage filtration (PP + ACF + UF).	All impurities present in the feed water are filtered to get purified water. SUITABLE FOR DRINKING	
Acidic 1 Mild	Produces water of pH 5.5	For facial cleaning and to minimize skin irritations. NOT SUITABLE FOR DRINKING	
Acidic 2 Strong	Produces water of pH 3.5	For cleaning the kitchen NOT SUITABLE FOR DRINKING	

Please note that the pH value of Alkaline / Acidic water will have a tolerance of +/- 0.5 depending on feed water quality. There will be a beep sound while dispensing Acidic water. This is to indicate to the users that it is not suitable for drinking.

Benefits you can get

■ WHAT IS ALKALINE WATER?

Alkaline water is the delicious and healthy water created from progressive water technology. This purifier, through the process of ionization, can instantaneously produce Alkaline water. Drinking alkaline water provides various health benefits thereby "Simplifying Healthy Living".

■ POWERFUL ANTIOXIDANT

The centrepiece of ionized alkaline water is its antioxidant properties. These hydroxyl ions seek out and neutralize free radicals, making them wonderful free radical scavengers and enabling a body rich in oxygen and energy.

■ BALANCE BODY pH AS AN EFFECTIVE ALKALIZING AGENT

Keeping the body at healthy pH level (mild alkaline) is people's first line of defense in fighting any disease. Alkaline ionized water creates a major impact in balancing the body's pH level. A body that is too acidic provides ideal environment for diseases to manifest and thrive in.

■ SUPERIOR HYDRATOR AND A POWERFUL DETOXIFIER

One of primary causes of disease is chronic cellular dehydration, which leaves the body's cells in a perpetual state of weakness and defense. Drinking alkaline water is six times more hydrating than "conventional" drinking water. Effective hydration also helps skin look healthier and smoother.

Exterior Design (WE-UF-02)

Product Description

1. The feed water of this unit is from the input tap source (municipal/domestic water). The water purifier is optimized to produce alkaline/acidic water using feed water TDS range of 50 – 300 ppm.
2. The output is either purified water by ultra-filtration or alkaline water or acidic water (depending upon the selector knob position). Please note that acidic water is not suitable for drinking.
3. Has external PP filter followed by 2-stage built-in filters (Active carbon and Ultra-Filtration) for water purification. Hence, installing the water ionizer is simple and convenient!
4. This Ionizer has large electroplates which increases usage life of the ionizer. System also has self-cleaning function.
5. This unit was manufactured by applying international advanced technology, with features of beautiful shape, attractive appearance and ease to use. It is suitable to use at home, hotel, office space and school place and to meet the different needs of the people.
6. This unit has adapted modular structure with stable quality, easy maintenance, energy saving, safe and convenient to use.
7. Additional features include high effluent flow rate, no leakage and longer lifespan.
8. There is a separate discharge outlet which should be connected by a pipe to remove the discharge water (produced while dispensing alkaline and acidic water).

Filter Description

1. External PP Filter: PP filter removes sediment, rust, suspended solids, colloids, etc
2. Activated Carbon Filter (ACF): Activated Carbon filtration can effectively reduce certain organic compounds, chlorine and taste/odour causing compounds in the drinking water.
3. Ultrafiltration filter (UF): UF filter removes harmful viruses, bacteria and heavy metals.

Technical Specifications

Product Name	VaVie Water Ionizer Purifier
Model Name	Water Element (WE-UF-02)
Rated Voltage	AC 230V / 50Hz
Protected Against Electric Shock	Class I Type
Feed water type	Direct pipeline water as feed water input
Filtration System	Contains external PP filter followed by built-in ACF (Activated Carbon Filter) and UF (Ultra-Filtration) to get purified water.
Available Water levels	<ol style="list-style-type: none"> 1. Alkaline Water 3 (Strong) - pH 9.5 2. Alkaline Water 2 (Medium) - pH 9.0 3. Alkaline Water 1 (Mild) - pH 8.5 4. UF Purified water 5. Acidic Water 1 (Mild) - pH 5.5 6. Acidic Water 2 (Strong) - pH 3.5 <p>1. pH value of Alkaline / Acidic water will have a tolerance of +/- 0.5 depending on feed water quality. 2. ACIDIC WATER IS NOT SUITABLE FOR DRINKING.</p>
Self-Flushing	LED blinks once every 2s when water is flushing (when mode is changed). The water can be used after the blinking stops.
Self-Cleaning	Cleaning will start once every 50 cycles of alkaline / acidic water being dispensed.
Package Size	360mm x 172mm x 430mm

FREE

1. One year free maintenance is provided (two times a year) which includes:
 - a. Checking for electrical parts
 - b. Checking for water leakage
 - c. Filters Replacement

Please call and make arrangement to service your VaVie Water dispenser at your location*.

* Service locations must be within Singapore only.

Customers are required to register online to enjoy the warranty and our after sales services.

1. Register online on the VaVie official website : www.vavie.com.sg
2. Please enter the necessary information on the "Warranty Registration" page.
3. Contact us
